PROFILE INFO

Hi, I am looking forward for great opportunity and enhancement of my skills in Information Technology. I am knowledgeable with basic background on some tech stacks like OOP languages, DBMS and knowledgeable with Agile Scrum Methodology I can also do some PC troubleshooting stuffs. I am also a team player and open for collaborative work to do and produce a product and to make a better working environment.

EXPERIENCE

2023 - 2024

PUPSKED: WEB-BASED AUTOMATED CLASS SCHEDULING APPLICATION

CAPSTONE PROJECT MANAGER AND PROGRAMMER

- I develop with my team a web - based class scheduling application that enables to automatically detect and generate schedules based on the curriculum, client's needs, and IT solutions.
- I lead the development process using Agile Scrum Methodology and communicate with our client to sustain and to satisfy the needs of the project.

2022 - 2023

iSITE President

IT President of Polytechnic University of the Philippines, Santa Maria Bulacan Campus

- Lead the organization for pursuing development and enhancement for the community, students, and stakeholders.
- I conduct and manage different kinds of project that can benefit my fellow students to achieve desire to learn modern IT technologies (Web Development Bootcamp and Microsoft 365 Webinar).
- Conduct communication with other school organizations and stakeholders to create projects to develop the skills of IT and non - IT students in the field of technology (Extension Program: PC Troubleshooting Workshop for High School Students).

2019 - 2020

Campus Mapping System

CAPSTONE LEADER AND PROGRAMMER

- Lead a team that create a Campus Mapping System for a school with different campuses.
- Develop a multifunctional system that can provide different reports to help researchers, teachers, students, and visitors alike.
